Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 20, drawn to a cutting apparatus, classified in classes 30,83,451 and 56.
- II. Claim 19, drawn to a method of cutting and mulching, classified in class 56.

2. The inventions are distinct, each from the other because the inventions of groups II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be employed without raking and mulching.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

The species come in two tiers, and Applicant must select one from each tier;

TIER I;

a lawn mower

hedge trimmers

hair clippers

cutting and grinding units in grinders

cutting and mixing units in mixers

Tier II;

Species A – figures 1a-5

Species B – figures 6-6c

Species C – figures 7-7b

Species D – figures 8-8a

Species E – figures 9-9a

Species F – figures 10-11

Species G – figures 12-13

Species H – figures 14-17

Species I – figures 18-19

Species J – figures 20

Species K – figures 21

Species L – figures 22

Species M – figures 23

Species N – figures 24

Species O – figures 25

Species P – figures 26-29

Species Q – figures 30-31

Species R – figures 32-34

Species S – figures 35-39

Species T – figures 40-41

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, some claims are generic to some groups.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 3724

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

To the extent that a few of the species may be considered subcombinations usable together. Examiner will consider arguments that involve the election of more than one of Species A-T. Be sure to elect just a single one of species A-T at the start of the argument, before digressing into a combination election.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 571-272-4512. The examiner can normally be reached on Mon-Thur, 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
